

Instructions and Product Information

Don't Become a Victim

Every so often we received inquiries from our customers regarding inconsistency in product performance. Those baffled customers, as usual turned out to be victims of counterfeiting, they inadvertently bought the fake Caboki from various online marketplaces.

Whenever a good brand is in demand, counterfeiters spring into action, ready to scam consumers like you. Counterfeiters sure can replicate our logo and package, but not our product performance and product safety.

How to Avoid Being Scammed

1. Purchase from Official sites:

caboki.com (US), caboki.ca (Canada), caboki.co.uk (UK), caboki.net.au (Australia), caboki.hk (HK), caboki.tw (Taiwan), caboki.cn (China), caboki.fr (France), caboki.it (Italy), caboki.es (Spain).

2. Verify authenticity: Each and every genuine Caboki comes with its own unique code that allows you to verify its authenticity at Caboki.com.

If what you've purchased does not have an Authenticity Verification code, it is fake!

Even if it comes with a code, you still must go to our site to verify, because the code could be fake!

Follow instructions at the back of package to verify its authenticity.

Instructions

Caboki is meant to thicken your existing hair, apply this product only to area with hair. Do not use it on completely bald area. Use on scalp hair only.

For best results, apply Caboki on clean and completely dry hair. Make sure your hands are completely dry. Don't use hair spray, gel or mousse before application.

Step 1

(If you want, take a picture now for comparison later.)

Style your hair as usual.

Peel off the seal and discard. Hold the bottle 1 inch above the thinning area at a 45 degree angle. You can adjust the tilt to increase or decrease the amount coming out of the bottle.

Gently shake or tap the bottle with your fingers to dispense Caboki onto the thinning area. SLOWLY build up to a natural coverage by repeating the application a few times until desired result.

Step 2

Pat your hair very gently with your palm in between applications to blend in Caboki. This is a very important step to let Caboki seamlessly merge with your hair, making it undetectable. You may also use a comb to gently style the applied area (avoid touching the scalp with comb).

Step 3

Last step, protect your style with hair spray. Don't hold the bottle too close to your hair; 1 foot (30 cm) away from your head is recommended.

Tips:

Here is another popular technique for applying Caboki on the scalp- create a part using a comb, and apply the Caboki along the part line. Create another part nearby and repeat until all area are covered with Caboki.

Tips for applying in the frontal area- Place your hand under the hairline to keep it from getting onto your face, or use Caboki Hairline Perfector.

Tips for applying in the crown area- With a wall mirror behind you, hold up a handheld mirror in the front to see your crown area in the wall mirror. Or you may face the wall mirror and hold up a handheld mirror close to the crown area.

First few uses may seem time-consuming. But once you get the hang of it, you will be able to get it done within minutes! Caboki gives such a boost to self-confidence, our customers fall in love with it once they learn how to apply Caboki, often after just a few uses. You will too!

Removal:

Any shampoo will remove Caboki. If Caboki gets on your hands, just wash with water. If stray Caboki falls on your clothes, just dust it off, it will not leave any stain.

Common Questions

1. Product does not come out easily

This happens when too much product aggregates inside the dispensing chamber (under the sifter); there is not enough air space for the product to move around, making it hard to flow out.

Hold the bottle upright (cap facing up) and tap the bottom of the bottle against a countertop 5-6 times to let some product in the chamber fall down into the container.

To prevent this problem from happening again, hold the bottle at 45 degree as shown in the instructions when you apply the product.

2. Color does not match my hair

Here are a few tips to pick the right color: Stand in front of a mirror, check the hair ROOT color in the thinning area. This is the color to match.

If you have salt & pepper or highlighted hair, match the darker ROOT color. For example, if your native hair color is dark brown with some grey hair or highlighted hair mixed in, choose our Dark Brown.

If your color does not match any of our shades, get 2 colors that are closest to your hair and apply both.

Common Mistakes by Beginners

Mistake 1: Use on bald or nearly bald area

Caboki needs HAIR to cling to. Avoid bare skin.

Mistake 2: Haste

If you are new to Caboki, GO SLOW, Avoid applying too much product all at once.

Mistake 3: Hair looks "dusty"

Remember to blend in Caboki by gently patting the applied area, or gently comb your hair (without letting the teeth touch the scalp). Don't put on too much product.

Mistake 4: Apply too much product

To make the result look natural, don't over apply. The less hair you have, the LESS product you should use. A little goes a long way.

Ingredients

Gossypium Herbaceum (Levant cotton) fiber, mineral colorants (Iron oxide).

Warnings

For external use only. Keep out of reach of children. If in contact with eyes, just wash out with water.
